

POLYCHEM C-800 RUST INHIBITORS

Description:

A complete line of concentrated aqueous corrosion inhibitors that you can simply add to a final rinse at low concentrations to prevent flash rust. **C-800** treated parts can be welded, painted, plated or brazed without defect when used at the proper dilution and application. A higher concentration can be used for longer term storage of treated parts. Ask your Polychem rep for the best **C-800** blend for your application.

Properties:

Composition	: Aqueous blend
Form	: Red liquid
Odor	: None
Use Concentration	: 1-10% by volume
Temperature	: Ambient to 180 °F.
Time	: 1-5 seconds
pH at use concentration	: Neutral
VOC Content	: Zero

C-800 is non-flammable, non-hazardous, and odor free
