

## POLYCHEM DEOX – 007

**Description:** **Polychem DEOX-007** is a mildly alkaline liquid blend of surfactants, sequestrants and emulsifying agents. Its excellent cleaning ability removes soils such as tarnish, stains, corrosion and oxidation from copper, brass, bronze, gold and silver parts.

**Polychem Deox-007** can be used to remove tarnish and brighten all kinds of jewelry, copper, brass and bronze parts such as antique clock, contact terminals, brass fittings, valves, gauge, meter, regulator part, welding torch tips, light fixtures, hand rails, other building hardware etc.

**Polychem Deox-007** can be used in agitated tanks and ultrasonic tanks or by manual application. All applications should be followed by a water rinse.

### **Recommendation**

Treat the cleaned/polished part in **PolyTect 2CB** for long term indoor protection against tarnish, corrosion or oxidation. **PolyTect 2CB** processed parts may be coated with lacquer or other transparent coatings.

### **Properties:**

Composition	: Aqueous alkaline blend
Form	: Clear liquid
Odor	: Mild
Use Concentration	: 5-20% by volume
Temperature	: 120-150 °F.
Time	: Variable
pH at use concentration	: 9.8 - 10.2

NO VOC, safe for the user and for the environment
